Abstract

Credit rating is a matter of significance for institutions, professionals, and researchers in diverse sectors. Recently, it has garnered increased attention within the scientific community, particularly regarding various banking aspects. Our research employs bibliometric data to explore trends in credit rating. We examined 107 articles from Scopus-indexed journals in Business and Economics up to 2022, focusing on "credit rating" and "Europe" in titles, abstracts, and keywords. Our findings unveil influential journals, authors, countries, and emerging terms. This provides insights into the current state and essential terminology in credit rating research. Furthermore, we suggest potential complementary studies to enrich this research and propose future research directions.

Keywords: Credit Rating, Business Research, Economics Research, Europe, Bibliometrics
